

Antibody to Human TIMP
(Tissue Inhibitor of Metalloproteinase)
(Monoclonal Mouse)

Cat. No.:	CA-1188-B2 (RRUT2)
Isotype:	Mouse IgG1
Specificity:	Inhibits biological activity
Cross reactions:	Reacts only with TIMP in both the reduced and non reduced state (Western blots) and with no other proteins so far tested. Does not recognize rabbit TIMPs
Presentation:	100µg (c=1 mg/ml) purified IgG in PBS containing 0.02% (w/v) azide
Applications:	Immunoblotting (5 µg for Western blotting and 1µg/ml per section for immunolocalisation), ELISA (at 5µg/ml) and related applications
Storage:	Store at +4°C. For extended storage, freeze in working aliquots at –20°C. Avoid repeated freezing and thawing.
