

Anti-Human FIBRINOGEN

(Polyclonal Rabbit)

Cat. No.:	CA-175
Titre:	The Titre value is at least 1/32 by double immunodiffusion, 1/1000 by ELISA.
Presentation:	This antibody is offered as the whole serum product in liquid form, and has been stored at -20 °C.
Cross Reactions:	This antibody has single antigen reactivity with minimal cross reactivity with other human serum products.
Applications:	Suitable for various techniques including: <ul style="list-style-type: none">- Detection of target antigens by double immunodiffusion / immunoelectrophoresis / 2-dimensional IEP.- Quantitative assay by ELISA / radio-immunoassay / turbidometry and nephelometry / laurel rocket IEP.- Immunochemistry: immunofluorescence/ immunoenzymatic techniques.
Storage:	On arrival, it is recommended that the antibody should be aliquoted into smaller volumes (in screw cap vials) and either refrozen or stored at 4 °C with 0.1% sodium azide preservative added.
