

Anti-Human FIBRINOGEN DEGRADATION PRODUCT D

(Polyclonal Rabbit)

Cat.No.:	CA-173
Antigen:	Highly purified plasmin digestion product D (high molecular weight) of human fibrinogen.
Titre:	Depending on application, this serum can be used at dilutions between 1:100 - 1:5000. At least 1:32 for double immunodiffusion and 1:1000 for ELISA
Cross-reactions:	Identity with intact fibrinogen and fibrinogenin from plasma. No cross-reaction with human fibrinogen fragment E (when assessed with double diffusion/electrophoresis) No cross reactivity with human serum.
Applications:	Immunoprecipitation / immunocytochemistry /Westerns / ELISA / discrimination of intact versus degraded fibrinogen in ELISA
Presentation:	Liquid antiserum
Storage:	Store at +4 °C. For extended storage, freeze in working aliquots at -20 °C. Avoid repeated freezing and thawing.
