

Anti-Human–Hepatocyte Growth Factor HGF

(Polyclonal Sheep)

Catalogue No	CA-1116
Host:	Sheep
Description:	anti-human Hepatocyte Growth Factor
Titre:	The titre value is at least 1/32 by double immunodiffusion or 1/1000 by ELISA.
Applications:	Suitable for a variety of techniques including:- a. Detection of target antigens by: Double Immunodiffusion / Immuno-electrophoresis / 2-Dimensional IEP b. Quantitative ELISAs c. Immunofluorescence / Immunoenzymatic Techniques / FACS
Cross Reactivity:	This HGF antibody has single antigen reactivity with minimal cross reactivity with other human serum proteins.
Storage:	This HGF unconjugated antibody is offered as the whole serum product in the liquid form, and have been stored at –40°C. It is recommended that on arrival this antibody should be split into smaller volumes, held in appropriate sized screw cap vials and either refrozen or stored at 4°C with 0.1% sodium azide preservative added. In either situation there is minimal loss of activity.
