

Nuclease-Free Water

Cat. No. W7350ML

Nuclease-Free Water is useful for many molecular biological and biochemical applications.

1. Product Specifications

Storage: Store at room temperature.

Molecular Weight: 18.016 daltons.

Contaminating Activity Assays: Nuclease-Free Water is prepared by autoclaving deionized water. The water is free of detectable exo- and endonuclease and RNase activities.
